

## *Product Announcement*

April 15, 2008

Subject: Return Line Kits for 700V and 300V Series Pumps now available.

Dear Valued Tuthill Transfer Systems Distributor,

Customers have been asking for a kit that will give them a way to plumb the new anti-siphon valve found on the Series 700V and 300V pumps back to the tank.

A return line kit is now available. The part number is 700KTH1067 with a list price of \$29.25 and a TC discount.

With this kit, the customer can now run a line from the anti-siphon back to the .25" port on the bung adapter. The anti-siphon valve will still break a siphon with this return line kit installed.

The kit comes complete with tubing, connections for the bung adapter and anti-siphon valve, and installation instructions. The kit will be standard in all FR713V, FR303V, and FR313V remote pumps.

The picture below shows the kit and a pump with the return line installed.

Please contact your Sales Representative or our Customer Service Department if you have any questions.

Sincerely,

Jeff Gerber
