

Product Announcement

#FRSB0027

Date of Bulletin: July 24, 2009
Effective Date: Immediately
Part #: 1200KTG9099
Affected Components: Telescoping Suction Pipe
Subject: Size of Suction Pipe
Issuing Authority: Sales

Telescoping Steel Suction Pipe Improvement

Tuthill Transfer Systems received a number of requests from customers to shorten the telescoping steel suction pipe to accommodate a wider variety of tank sizes. As a result, the suction pipe now extends 20 inches to 34 $\frac{3}{4}$ inches, instead of its predecessor that extended 22 inches to 40 inches.

Shortening the pipe still allows it to reach the bottom of a 55 gallon tank, but the new size increases the number of truck mounted tank sizes that the suction pipe will fit.

The part number for the telescoping steel suction pipe remains the same (1200KTG9099).

Please feel free to contact your Tuthill Transfer Systems Representatives if you have questions.

No field action is required for this Product Announcement Bulletin. It is for informational purposes only.

Sincerely,

John Cazes
Vice President of Sales
