

# Product Announcement

#FRSB0028

**Date of Bulletin:** July 29, 2009  
**Effective Date:** Immediately  
**Part #:** 6U075  
**Affected Components:** 3/4" UL Manual Nozzle - Part # 6U075  
**Subject:** 3/4" UL Manual Nozzle Change  
**Issuing Authority:** Marketing

## 3/4" UL Manual Nozzle

Tuthill Transfer Systems announces its intention to stop offering the 3/4" UL manual nozzle (part # 6U075) effective **August 15, 2009**. TTS will instead offer 3/4" UL EBW packaged nozzle (part # 1200G8562). The difference is cosmetic only. The customer will not notice a difference in the performance of the EBW nozzle. See images below.

Tuthill Transfer Systems plans to launch a newly engineered manual nozzle in February 2010. This nozzle combines rugged materials and a robust, ergonomic design to create a manual nozzle unlike anything Tuthill has ever offered.

If you have any questions regarding the 6U075 phase out, contact our Customer Service team at 800-634-2695 or your Tuthill Transfer Systems Sales Representative.

3/4" UL Manual Nozzle  
Part # 6U075

3/4" UL EBW Manual Nozzle
