

Service Bulletin

#FRSB0026

Date of Bulletin: June 17, 2009
Effective Date: Immediately
Meter Series Affected: All 800 / 900 Series Meters
Affected Components: Rear Body
Subject: New Rear Body Castings
Issuing Authority: Engineering

900 Series Meter Body Casting Changes

The 900 Series Meters have recently undergone changes in the meter body casting. Several changes were incorporated into the new casting. Please note that this change is currently applicable only to the 900 Series Meters; however, please be aware that similar changes will also be implemented into the 800 Series Meters in the near future.

Production of these meters is still located in the Ft. Wayne, Indiana "**FILL-RITE**" facility where we remain fully committed to providing the best possible product.

The pictures below illustrate the changes that have been made. Key among those changes are:

- Addition of the new Tuthill Logo branding to the product.
- Regulatory markings were removed from the casting and moved to the face plate for more contrast and improved manufacturing flexibility.
- Design lines were rounded and smoothed for a cleaner look.

Old 900 Series Meter Body

New 900 Series Meter Body
